Call for Presentations

2018 Conference & Exhibition
December 5-7, 2018

The i2i Center for Integrative Health will continue the NC Council of Community Program's tradition of hosting the Pinehurst Conference on December 5-7 in Pinehurst, NC. This event offers presenters and their organizations exposure to over 800 leaders and professionals representing healthcare payers, LME/MCOs, MH/IDD/SUD providers, State agencies, advocates, consumer and family members and other stakeholders.

This year's conference will focus on innovation in the evolving public system that highlights whole person, integrated care for primary, behavioral health and I-DD services. We encourage submissions that address **clinical, administrative, and operational aspects of systems and service integration. Suggested topic areas include but are not limited to the following:**

- **Value Based Care and Payment Structures (with an emphasis on integrated care)**
- **Technology, Data and Information Sharing (including consumer self-management through technology)**
- **Evidence-based Initiatives and Innovations: Supporting Recovery, LTSS and Whole Person Care**
- **Cross-System Linkages (DSS, Public Health, State hospitals, etc.)**
- **Critical Consumer Participation and Self-advocacy related to Integrated Care**

Proposals will be considered for pre-conference and main conference sessions (1.5 – 2 hours, policy focused), or as Sparking Innovations topics (1 hour, project focused).
